

# Plant Invasion Worksheet

Name

Date

In the box below, write important information from the story and record important numbers. Use this information to answer the questions. Show your calculations. Use the back of the worksheet or separate piece of paper if needed.

1. How many plants grew after the event?
2. How many seeds will be produced for the seedbank?
3. How many plants will appear in the forest the following year?
4. There could be over 37 million invasive plants in the forest by the end of the second year! How is this possible? Show your calculations. Continue calculations for growth for a five year period.
